Is Your Water Safe?

Give Your Back a Break...Stop Adding Salt to Your Softener

Minerals in your water form scale deposits that build up inside your pipes, water heater, shower heads, and other water using equipment like cholesterol in your arteries. These deposits significantly decrease the efficiency of your plumbing systems. Drinking water and icemakers are also negatively affected, as are health quality of water and taste. Hard water is not safe for you, your family or your home.

Benefits of a No-Salt Water Conditioning System:

Maintain healthy calcium & magnesium levels

No sodium added to water

No waste water vs. up to 10,000 gallons per year with salt softeners

No environmental discharge of salt or chemicals

Reduces iron staining

Extends appliance life by 50% or more

Descales inside of pipes & water heater

Cleaner bodies, clothes, and dishes

25% or more reduced detergent use

Clothing will last longer

Cleaner more refreshing water

Improves water heater efficiency and thus lowers energy bills
